

HCAI – Printing OCFs Following an Adjudication Decision

HCAI was built to mirror the original OCF forms in most cases. As a result, there is one column for totaling on all OCF forms. Once a decision is made by an adjuster either to “Do Not Approve” or to “Partially Approve” the services or goods billed on an OCF form, the HCAI system populates the form with the final amount(s) approved or not approved.

If an adjuster wants to print the OCF form displaying the amounts requested (e.g., either to send to an I.E. or for his or her own files), a specific work flow should take place.

The adjuster should open the OCF form. The Summary tab will be displayed:

- 1) Scroll to the section which displays the “activity log”
- 2) Select a previous version of the form before the decision was made
- 3) Click on the Version# and open form
- 4) Print form
